Backend Developer

Objective:

I am an enthusiastic and committed front-end web developer with a passion for learning and applying new knowledge to real projects. I have development qualifications in HTML, CSS, JavaScript, ES6, Bootstrap, , Php, MySQL, and Laravel. I have a strong understanding of responsive design principles and cross-browser compatibility. I am committed to providing the highest level of hard work, sharing knowledge, and collaborating frequently with others to create new and improved products. I am excited about the opportunity to continue learning and gaining more experience as a Software Engineer while contributing to the development of interactive and user-friendly websites.

Education:

Faculty of Computers and Information, Kafr El-Sheikh University.
